

# Shed design & construction

Design and build your next shed to maximize your returns

## Advantages

- » Turn-key construction solutions with a registered building team, Australia wide
  - » Project management or project assistance
  - » Buildings are designed to your particular requirements
  - » Complete project and shed design
  - » Certified computer aided drafting (CAD) drawings describe all details of shed construction
  - » Controlled ventilation system design, or natural ventilation
  - » Council building applications taken care of
  - » Special drawing sets prepared for owner-builders
  - » Complete equipment supply solutions; crates, stalls and penning made-to-order.
- » We design and build sheds to modern industry standards of design, welfare and productivity. Let us handle all aspects of the project from draft drawings through to completion. Call us for a meeting, referral, site inspection or cost estimate.
